22nd IEEE International Requirements Engineering Conference

http://www.re14.org

August 25-29, 2014. Karlskrona, Sweden.

Innovation *in* and *through* Requirements Engineering

RE'14 has a dual theme focused on innovation. Innovation ***in*** Requirements Engineering considers new ideas and breakthroughs in the area. Innovation ***through*** Requirements Engineering centers on how its practices, processes, models, methods and frameworks enable and support innovation in product development.

RE'14 will take place in Karlskrona, Sweden. Sweden's southernmost archipelago is composed of 1,993 islands, skerries and islets - from Hasslö in the west to Utlängan in the east. Karlskrona can be reached by airplane from Stockholm, by direct train from Copenhagen or by ferry from Gdynia, Poland.

The IEEE International Requirements Engineering Conference series is the premier international forum for researchers, industrial practitioners, educators, and students to present and discuss the most recent innovations, trends, experiences, results and challenges in the field of RE.

CALL FOR CONTRIBUTIONS

RE'14 invites original submissions of ***research papers*** and ***industry papers*** in all areas of requirements engineering including elicitation, specification, modeling, analysis, verification and evolution. Categories of **research papers** include Technical Solution papers that describe and validate better solutions to requirements problems, Scientific Evaluation papers that evaluate existing problem situations or proposed solutions by scientific means and Vision papers that explore successes and challenges of requirements practices, or present research roadmaps. **Industry papers** report on the application of requirements engineering techniques in real-world settings, present problems or challenges encountered in practice and report on innovative approaches to requirements engineering practice in industrial or government settings. RE'14 also welcomes submissions for ***workshops***, ***tutorials***, ***panels*** and ***interactive events***, ***poster*** and ***tool demonstrations*** and the ***doctoral symposium***.

EXPLORE SCENIC KARLSKRONA!

The conference will be hosted at the main campus of Blekinge Institute of Technology, a modern university situated in the ***17th-century naval city*** of Karlskrona. Karlskrona, a UNESCO World Heritage site, preserves many of its original landmarks and ***baroque architecture***. The city sits in the Blekinge archipelago of 30 islands, which forms a nature preserve that is designated as a ***UNESCO Biosphere Reserve***. Close to nature and the ocean and with plentiful cultural sites, this popular region attracts many recreational visitors. The region is also well known for its high-tech industry and is host to many leading companies.
